

“Bringing the benefits of outsourcing to small and medium businesses”

TLI is headquartered in Toronto, Canada with a dynamic development center in India at Bangalore and satellite offices in the United States and the United Kingdom.

We have a workforce that is 200 strong divided between our Business Process Outsourcing, Software and Web Development services focusing on small and medium Enterprises.

We excel in providing small and medium companies with the tools to compete with large corporations. We can do everything from small projects to handling all aspects of your company's Software and Web Development needs.

TECHNOLOGY

LEADERSHIP

INNOVATION

Project Management Team

We emphasize on building strong relationships with clients with a long term goal. TLI has dedicated account managers and is sensitive to cultural differences. TLI uses an international contingent of employees that understands the differences between various cultures and how to best manage each client account and the clients have 24/7 access to our project management team.
